

MESA™

Stain Colorants

Mesa™ Stain Colorants provide an appealing, long-lasting layer of color on concrete surfaces. These translucent stains react with the surface to create a natural look, with patterns and colors that accent the dark and light mottling or marbling of the concrete. A range of shades, from warm terracotta to deep blue or green, is available to give any area a one-of-a-kind look and feel.

Once applied, Mesa Stain Colorants are resistant to chipping, peeling, discoloration or fading. They are durable and resilient against water, radiant heat and UV light, resulting in a lasting finish that retains its beauty and elegance over time.
